

When fastened to the AIRFIX DRAW ALIGNER, the XL tower generates a pulling force of 350 kg, making it easier to remove dents from the upper sections of commercial vehicles, 4x4s and SUVs up to 2 m high.

Pulling distance up to 2 m

Simple and ergonomic winch height adjustment.

Ultra-strong, lightweight rope with a maximum tensile strength of 1.5T.

Pulling force **up to 350 kg** over the entire upper section of the mast, **from 1.30 m to 2 m**.

Very straightforward to use: fastened by a strap to the AIRFIX.

No need for compressed air, anchoring to the ground is done by the AIRFIX.

Lightweight (21 kg) and easy to move around the workshop on 2 wheels.
