

The POWER PACK 14.15 Fast Charge is a portable power bank that combines a Lithium-Ion (LiFePO4) battery and a Pure Sine Wave (PSW) inverter to power or charge all kinds of electronic devices (1500 W). IT OUTPUTS BOTH 12 V DC VOLTAGE AND A 230 V AC POWER SUPPLY. The ultra-fast recharge capability (1 hour max) means it is a source of power that is available in next to no time, and its large power storage capacity ensures it has the necessary runtime to keep most electrical appliances charged or running in all kinds of situations.

A MULTI-APPLICATION PORTABLE POWER SOURCE

The Power Pack 14.15 FC can be used wherever an independent source of electricity is required:

- on remote work sites, far from any electrical installation.
- on an outdoor activity: when camping, in motor homes, when out recreational boating, fishing, or other outdoor leisure activities, and also for DIY.

Multiple applications

Adapted connectors

The Power Pack 14.15 FC has multiple connectors that provide a charging solution for a wide range of electronic devices:

Maximum safety

The Power Pack 14.15 FC is protected against short-circuits, overcurrents, overvoltage, undervoltage, overloads and overheating.

RECHARGE IN RECORD TIME

One of the many advantages of the Power Pack 14.15 FC is the ultra-fast charging speed. Recharging the unit via mains power only takes a maximum of one hour. Additionally, the unit can also be charged by two 220 W solar panels (optional).

A BOOSTER FOR 12 V VEHICLES

The Power Pack 14.15 FC has a 'Booster' function for starting vehicles fitted with discharged 12 V lead (liquid, gel, AGM, Start&Stop) and lithium LiFePO4 batteries in a matter of seconds (1V/C: 500 A).

DESIGNED FOR OUTDOOR USE

- A compact device, with robust side handles, that can be transported anywhere.
- Equipped with an LED light with 5 settings (low-medium-high, SOS, Flash).
- LCD display presenting various information (state of charge, inputs/outputs used, etc.)

OPTIONAL ACCESSORIES FOR COMPLETE INDEPENDENCE

Power Batt 14 - External battery
085213

The Power Batt 14 is an external lithium battery with a storage capacity of 1408 Wh, doubling the runtime of the Power Pack 14.15 FC.

Includes

2816 Wh
operating time x 2

Solar panel
079403

mono crystalline
ETFE quality
48V - 220 W max
output: MC4

The 48 V - 220 W solar panel is an ideal recharging option for the Power Pack 14.15 FC. Connecting two panels to the two dedicated solar inputs (2 x 200 W max) delivers fast, continuous recharging, so the unit can run uninterrupted.

LED display

Supplied with accessories

mains charging cable

charging cable
jack > cigarette lighter

Intelligent starter cable

solar panel charging
cable
Anderson > MC4
